Damaris Wanjiru Ngari\ **Junior Full Stack Software Developer**\ Nairobi, Kenya | +254745435422 | wanjirungari2@gmail.com\ LinkedIn | GitHub

Professional Summary

Passionate full-stack developer trained at Moringa School with hands-on experience in building user-centric applications using Python, React, and JavaScript. Leveraging 3+ years of client-facing experience to solve real-world business problems through tech. Currently sharpening backend development by working through Python Crash Course mini-projects and deploying apps with Flask and SQL.

Proficient in writing clean, maintainable code, collaborating in Agile teams, integrating secure APIs, and building robust CRUD functionalities. Open to freelance opportunities and junior full-time developer roles—especially those involving backend problem-solving.

Technical Skills

- **Frontend:** React, JavaScript, Figma, HTML5, CSS3
- **Backend:** Python, Flask, RESTful APIs
- **Databases:** SQL, PostgreSQL
- **Tools:** Git, VS Code, Agile Methodologies
- **Backend Concepts:** CRUD operations, API integration, authentication, database design
- **Soft Skills:** Problem Solving, Team Collaboration, Communication, Sales & Marketing
