

Damaris Ngari

Backend Software Developer

+254 745435422 | [email](#) | [LinkedIn](#) | [github](#) | Kenya

PROFESSIONAL SUMMARY

Passionate Backend Developer with hands-on experience building functional applications and APIs using Python, Flask, Node.js, and JavaScript. Skilled in designing efficient, scalable backend systems, integrating databases, and ensuring smooth API communication.

Experienced with automation and testing using Puppeteer, Postman, and Selenium. Open to freelance or junior full-time roles focused on backend development and problem-solving. Committed to writing clean, maintainable code and continuously improving through learning and collaboration.

SKILLS & COMPETENCIES

- **Backend:** Python, Flask, Node.js, RESTful APIs, CRUD operations, authentication, database design, API integration
- **Databases:** PostgreSQL, MySQL, MongoDB, SQL
- **Testing & Automation:** Manual Testing, Postman, Selenium, Puppeteer, CI/CD
- **Tools & Version Control:** Git, GitHub, VS Code, Agile Methodologies
- **Frontend (Basic):** JavaScript, React, HTML5, CSS3 (for API integration/testing purposes)
- **Soft Skills:** Problem Solving, Team Collaboration, Communication, Attention to Detail

Projects

Scrimba Practise- [Github Link](#)

This is a repository documenting my JavaScript learning journey, from basics to small, functional web projects.

It contains code-along projects from Per Harald Borgen's Scrimba course, offered via freeCodeCamp. Each folder represents a project or exercise completed to practice, experiment, helping me understand how code connects to real-world functionality.

Code with Garcia- [Github Link](#)

This is another repository documenting my JavaScript learning journey.

Coded along a YouTube JavaScript tutorial endorsed by freeCodeCamp, gaining essential fundamental skills.

Mastered symbols, operators, control flow, and loops to create dynamic, interactive programs.

Explored functions, including expressions and declarations, to write clean, reusable, and maintainable code.

Maternity-Companion-for-African-Mums - [Github Link](#)

This is a web platform supporting African mothers with personalized pregnancy tracking, localised content, expert Q&A and community support.

I developed the admin panel for a web app connecting pregnant moms and health professionals.

Managed user verification and account administration.

Moderated community content by approving or rejecting flagged posts and comments.

Monitored analytics and sent notifications to keep users informed.

Ensured a safe and engaging environment for users through community management tools.

EXPERIENCE

Software Developer Freelance

August 2025 - Present | Kenya

- Developed and tested web applications and mini-projects using JavaScript, Node.js, and Puppeteer.
- Wrote automation scripts to simulate workflows and streamline testing processes.
- Assisted peers by debugging, testing, and improving code quality across small projects.
- Applied programming concepts in practical projects to build functional, real-world solutions.
- Maintained project version control and collaboration using Git and GitHub, continuously expanding technical skills

EDUCATION

Moringa School | Software Engineering completed

- Relevant Coursework: JavaScript, Node.js, Web Development, Automation, Git & GitHub, Software Testing

Mount Kenya University | Bachelor of Science in Business Information technology completed

Kiriri Women's University | Diploma of Business Information technology completed
