

Damaris Ngari

FullStack Software Developer

+254 745435422 | [Email](#) | [Linkedin](#) | [Github](#) | [Portfolio](#) | Kenya

SUMMARY

Junior Developer aspiring to build scalable, efficient applications and APIs in the tech industry. Passionate about JavaScript, Python, Flask, Node.js, and problem-solving with hands-on experience in backend development, database integration, automation, and testing. Open to freelance or junior full-time roles.

SKILLS

- Backend: Python, Flask, Node.js, RESTful APIs, CRUD operations, authentication, database design, API integration
- Databases: PostgreSQL, MySQL, MongoDB, SQL
- Testing & Automation: Manual Testing, Postman, Selenium, Puppeteer, CI/CD basics
- Tools & Version Control: Git, GitHub, VS Code, Agile Methodologies, AWS
- Low-Code: Deluge (Zoho scripting for automation and integrations)
- Frontend (Basic – for API integration/testing): JavaScript, React, HTML5, CSS3
- Soft Skills: Problem Solving, Team Collaboration, Communication, Attention to Detail, Adaptability, Continuous Learning, Time Management

PROJECTS

Maternity Companion for African Mums - [\[GitHub Link\]](#)

Web platform supporting African mothers with personalized pregnancy tracking, localized content, expert Q&A, and community support.

- Built an admin panel with React-based frontend dashboards for user management and backend with RESTful APIs for user verification, account administration, and content moderation.

Scrimba Practice – [\[GitHub Link\]](#)

Repository documenting my JavaScript learning journey, from basics to small, functional web projects.

- Completed code-along projects from Per Harald Borgen's Scrimba course via freeCodeCamp.
- Experimented with code to understand real-world functionality and connectivity.

Flowdesk Management App– [\[GitHub Link\]](#)

An app for customer relationship management staff.

- Enables CRM users to add tasks manually and automatically for an efficient workflow.
- Demonstrated full-stack capabilities by connecting frontend UI to backend.

EXPERIENCE

Junior Developer | Freelance

July 2025 - Present | Kenya

- Developed and tested web applications and mini-projects using JavaScript, Node.js, Flask, and Puppeteer.

- Assisted peers by debugging issues, performing manual testing, and improving code quality across projects.
- Applied programming concepts to deliver functional, real-world solutions.
- Maintained version control and collaboration using Git and GitHub, continuously expanding technical skills.

Key Accomplishments:

- Through manual testing combined with automation scripts, I significantly reduced manual testing effort and problem-resolution time, freeing up more time for project upgrades and development.
- Earned **Oracle Cloud Infrastructure 2025 Foundations Associate** certification ([link](#)) from Oracle University, demonstrating foundational knowledge of OCI cloud services.
- Completed **Generative AI Essentials** course from Moringa School, gaining practical skills in prompt engineering, ethical AI use, and productivity tools like ChatGPT for real-world application.

EDUCATION

Moringa School | Software Engineering – Completed

Mount Kenya University | Bachelor of Science in Business Information Technology – Completed

Kiriri Women's University | Diploma in Business Information Technology – Completed
