

Damaris Ngari

Full Stack Software Developer

Nairobi, Kenya | +254 745435422 | [Email](#) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Junior Full Stack Software Developer with hands-on experience building web applications and APIs using Python (Flask), Node.js, JavaScript, and React. Passionate about backend development, database integration, automation, and testing. Actively working on personal projects and supporting peers with development and testing tasks. Eager to contribute and grow in a junior or freelance role.

SKILLS

- Backend: Python, Flask, Node.js, RESTful APIs, CRUD operations, authentication, database design, API integration
- Databases: PostgreSQL, MySQL, MongoDB, SQL
- Testing & Automation: Manual Testing, Postman, Selenium, Puppeteer
- Tools & Version Control: Git, GitHub, VS Code, Agile Methodologies
- Frontend: JavaScript, React, HTML5, CSS3
- Soft Skills: Problem Solving, Team Collaboration, Communication, Attention to Detail, Adaptability, Continuous Learning, Time Management

PROJECTS

Jumia Product Scraper – [Live Link](#)

Built a real-time product tracking system that scrapes and analyzes e-commerce data.

- Developed automated scraping workflows for extracting product data at scale
- Designed an interactive dashboard displaying product metrics and updates
- Implemented manual trigger and scheduled scraping features
- Enabled CSV export for external data usage and reporting

Currency Converter – [Live Link](#)

Developed a responsive application for real-time currency conversion.

- Integrated external APIs to fetch live exchange rates
- Implemented conversion history tracking for user reference
- Built a clean and responsive UI using JavaScript, HTML, and CSS

Flowdesk Management App – [Live Link](#)

Created a task management tool designed for workflow efficiency.

- Built features for manual and automated task creation
- Structured application logic to support scalable task handling
- Focused on usability and clean interface design

EXPERIENCE

Junior Developer | Freelance

August 2025 – Present | Nairobi, Kenya

- Developed full-stack applications including web scrapers, dashboards, and task management tools
- Built automation scripts with Puppeteer for testing and data extraction
- Assisted friends with debugging, testing, and improving project quality
- Maintained clean code and version control using Git & GitHub

KEY ACCOMPLISHMENTS

- Significantly reduced manual testing effort by combining manual testing with automation scripts
- Earned Oracle Cloud Infrastructure 2025 Foundations Associate certification from Oracle University
- Completed Generative AI Essentials course from Moringa School, gaining practical skills in prompt engineering, ethical AI use, and productivity tools

EDUCATION

Software Engineering – Moringa School (Completed)

Bachelor of Science in Business Information Technology – Mount Kenya University (Completed)

Diploma in Business Information Technology – Kiriri Women's University (Completed)

ADDITIONAL INFORMATION

- Strong interest in backend systems, automation, and scalable architecture
- Actively building and refining real-world projects
- Portfolio available showcasing APIs, testing workflows, and development practices
